Re: Soil Feasibility Study, Northumberland Co. Map # 06-01-005H

Dear Mr. Brown,

At your request, a soil feasibility study was conducted on the above referenced parcel on January 08, 2025. The purpose of this study was to determine if soils on the property were suitable for an Onsite Sewage Disposal System. The suitability of soils to support Onsite Sewage Disposal Systems are determined based on physical and chemical properties of the soil, soil type, structure, texture, and indicators of seasonal water table. Other measures taken into consideration throughout the evaluation process are available area, topography, location of drinking water supplies, bodies of water, landscape position and the Virginia Department of Health's Sewage Handling and Disposal Regulations.

After conducting soil evaluations throughout the parcel, I have determined that the site is capable of supporting a conventional sewage disposal system. There is sufficient area to accommodate a twelve bedroom dwelling. Soil borings have been flagged onsite.

I appreciate the opportunity to have performed this evaluation. If you have any questions or if I can be of further assistance, please feel free to contact me at (804) 366-1137.

Sincerely,

Alwyn W. "Wyn" Davis Jr.

Virginia Authorized Onsite Soil Evaluator # 194000136
